idfkit Brand Mark: nine boards

These boards are the working surface on which six directions for the mark were drawn and compared on 2026-10-30. Nothing is derived from them: the geometry of the chosen mark is recorded in `mark.py`, and the masters in `marks/` are generated from it.

1. Overview: six directions
2. 01 Block Bolt
3. 02 Part
4. 03 Zone
5. 04 Semicolon
6. 05 ik Monogram
7. 06 Boundary
8. Suite lockups
9. 02 Part, refined (final)

Notes on the canvas:

- Shortlist

  Zone (03): the safe pick. The thermal zone is the atomic unit of every EnergyPlus model, and the half-filled block reads at 16 px.

  Semicolon (04): the ownable pick. Every IDF object ends in a semicolon; no other building-science tool can claim it.

  Block Bolt (01): continuity with the lightning glyph already on idfkit.com.

  All six are single-colour and drawn on a 48-unit grid, so they recolour with CSS and survive a favicon.

BRAND MARK EXPLORATION · 48-UNIT GRID · SINGLE COLOUR

ink #e2e8f0 on #060a14 · ink #0b1020 on #ffffff

Six directions for the idfkit mark

01

Block Bolt

The lightning glyph already on idfkit.com, redrawn as a geometric cut-out of a building block.

02

Part

A block with one piece lifted out of its slot: a kit of parts that fit together.

03

Zone

The thermal zone, the atomic unit of every EnergyPlus model, drawn as a half-filled isometric block.

04

Semicolon

Every IDF object ends with a semicolon. The terminator, squared off, becomes the mark.

05

ik Monogram

i for idf, k for kit. Two letters built from bars and a chevron, nothing curved.

06

Boundary

Inside and outside, solid and void, split by the envelope. The whole discipline in one diagonal.

FAVICON TEST · 16 PX

32 PX

01 · BLOCK BOLT · ON DARK

idfkit

48 32 24 16

01 · BLOCK BOLT · ON LIGHT

idfkit

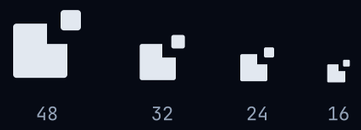

The bolt alone, for inline use beside text.

Single accent, brand blue.

02 · PART · ON DARK

idfkit

02 · PART · ON LIGHT

idfkit

- Variant: the empty slot traced, for an explainer or empty state.
- Two-tone: the piece in brand blue.

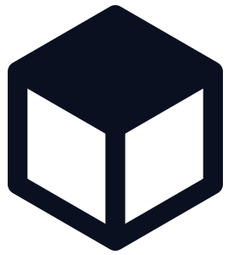

03 · ZONE · ON DARK

idfkit

03 · ZONE · ON LIGHT

idfkit

Variant: solid faces in two tints of one ink, for app icons.

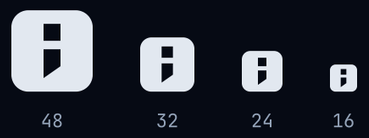

Single accent, brand blue.

04 · SEMICOLON · ON DARK

idfkit

48 32 24 16

04 · SEMICOLON · ON LIGHT

idfkit

idfkit

Variant: the terminator closes the wordmark itself.

```
Zone,
  Core;
```

Where it comes from: every object in an IDF ends in one.

05 · IK MONOGRAM · ON DARK

05 · IK MONOGRAM · ON LIGHT

Variant: reversed on a tile, for app icons and avatars.

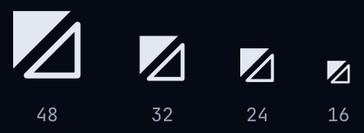

Two-tone: the k in brand blue.

06 · BOUNDARY · ON DARK

idfkit

48 32 24 16

06 · BOUNDARY · ON LIGHT

idfkit

Variant: two solid tints of one ink, no stroke, for tiny sizes.

Two-tone: the outside in brand blue.

SUITE SYSTEM · ONE MARK, ONE WORDMARK, A MONOSPACED SUFFIX

Switch the mark in Tweaks

The mark never changes. The suffix names the tool.

RULES			
	One mark for the whole suite. Product identity lives in the suffix, never in a recoloured or modified mark.	Wordmark in Inter 800, tracking -0.035em, lowercase. Suffix in JetBrains Mono 500, muted ink, baseline-aligned.	Envelop keeps its own name and takes the mark as an endorsement: the mark, then "envelop", then "by idfkit".

02 · PART · FINAL GEOMETRY

48-unit grid · body 32 · notch and piece 12 · offset 8 · radii 3 and 2

Part, refined

CONSTRUCTION

ink 40 × 40, centred in 48

body 32 × 32, r 3

notch 12 × 12, sharp

piece 12 × 12, r 2

offset 8 up, 8 right

Dashed: the ink box and the empty slot.

CORNER RADIUS OPTIONS · THE THIRD IS FINAL

sharp · sharp

r 2 · r 2

r 3 · r 2 · final

r 3 · r 3

The body's radius scales with its size; the piece keeps a smaller one so it still reads as the same material. A uniform radius makes the piece look like a pill at 16 px.

CLEAR SPACE AND MINIMUM SIZE

Clear space on every side equals the piece: 0.3 of the ink height.

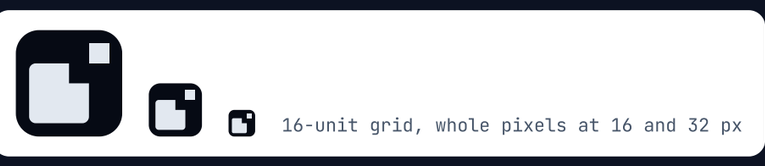

32 24 16 min

TILE, FAVICON AND APP ICON

Ink spans 56 % of the tile, inside the 80 % maskable safe zone. Corner radius 22 %.

16-unit grid, whole pixels at 16 and 32 px

idfkit-lockup-on-dark.svg · Inter ExtraBold outlined, -0.035 em · mark on the baseline, gap 0.3 of its height
